Eggplant Functional

Eggplant DAI

Results-driven Senior Software Test Engineer with 4+ years of experience in end-to-end test automation for enterprise applications. Skilled in designing scalable automation frameworks using Selenium WebDriver, Appium and Playwright, reducing manual effort and improving regression coverage. Proficient in Java, TestNG, Maven, Git, and JIRA, with experience in Eggplant Functional for model-based testing. Adept at implementing Page Object Model (POM) and leveraging Playwright's cross-browser testing capabilities. Proven track record of contributing to CI/CD pipeline integration, and thriving in Agile environments.

Experience

Senior Software Test Engineer

Ideabytes Software Private LTD. / 09/2022 - Present

Project: MindNotes Mobile Application

Tech Stack: Appium, Java, TestNG, Maven, GIT, JIRA

- Developed **mobile automation framework using Appium with Java and TestNG**
- Implemented **Page Object Model (POM)** for scalable and maintainable automation design
- Automated end-to-end test scenarios for multi-language UI validation modules
- Created **dynamic XPath strategies** for multilingual and dynamic UI elements
- Integrated automation suite with Maven build lifecycle for execution management
- Designed reusable utility methods for waits, driver initialization, and element handling
- Reduced manual regression effort by automating sanity and regression test suites
- Debugged synchronization issues and improved locator stability in collaboration with developers
- Worked on dynamic locators and synchronization strategies

Project: Keysight Technologies – Web Application

- Designed, developed, and executed UI and end-to-end automated test scenarios for enterprise web applications using **Playwright** and **JavaScript**
- Built and maintained functional, regression, smoke, sanity, and golden pack test suites to ensure comprehensive test coverage using Eggplant Functional (EPF) and Digital Automation Intelligence (DAI)
- Performed globalization and localization testing across English, Japanese, Chinese, and Korean locales using a common reusable automation script, validating UI behavior and locale-specific formatting
- Implemented **AI-driven and model-based automation** to improve test coverage and execution efficiency
- Executed **cross-browser and parallel testing using Playwright's built-in capabilities**
- Automated test execution reporting using Playwright APIs, **reducing manual effort by approximately 75%**
- Streamlined automation workflows by implementing reusable components for pre-requisites, proxy configuration across environments, and reporting, **reducing overall processing time by 30%**
- Translated business and functional requirements into reliable and maintainable automated test cases
- Performed test execution, defect analysis, and reporting across multiple test environments
- Logged, tracked, and managed defects using JIRA, ensuring timely follow-up and resolution

Manual Testing - Web & Mobile

Defect Life Cycle

SDLC & STLC

Languages

English

Hindi

Telugu

- Optimized and enhanced the test automation framework in alignment with project requirements, coding standards, and best practices
- Collaborated with cross-functional teams in an Agile/Scrum environment and actively participated in sprint ceremonies and release activities
- Used **Git** and SourceTree for version control and automation code management

Mentorship & Leadership

- Served as the **senior-most automation engineer** on the project, guiding junior engineers and ensuring best practices
- Mentored and trained junior engineers on Playwright and Eggplant automation
- **Reviewed automation scripts** and provided feedback to improve quality and reusability
- **Assisted junior engineers** in debugging automation failures and resolving environment issues
- Provided day-to-day technical guidance to Agile teams

Associate Analyst

GlobalLogic Technologies Private Limited / 07/2021 - 03/2022

Manual Testing:

- Conducted comprehensive **manual functional and regression testing for web-based applications**
- Analyzed requirements, designed test cases, and created test scenarios to ensure thorough test coverage
- Identified, logged, and **tracked defects using JIRA**, collaborating with development and QA teams to validate fixes
- Actively participated in **Agile processes** and supported test execution during sprint cycles and release testing

Automation Testing:

- Gained hands-on experience in automating web-based applications using **Selenium WebDriver with Java**
- Developed and maintained automated test scripts using TestNG and Maven for efficient test execution
- Implemented Page Object Model (POM) design pattern to enhance test script maintainability and reusability
- Utilized Selenium WebDriver's capabilities for cross-browser testing and ensuring application compatibility

Education

Master of Technology (CNIS)

*MGIT
